Notes	Notes	Notes

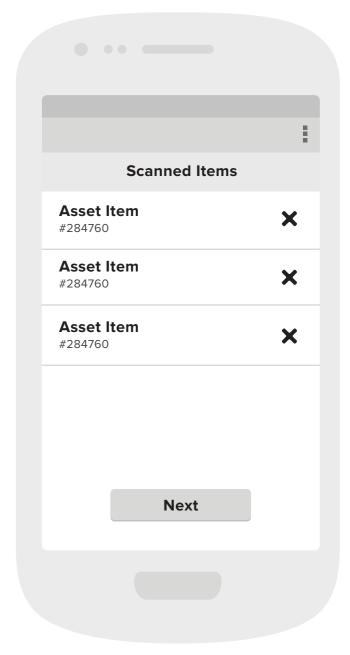

- If a tag or Serial Number is match, the process continues
- If New Purchased Order is selected, the HW will be added to the PO

Cosmic

#### **SCANNER INTRO**

# Notes

- Users can chose to pair a scanning device, if so; tapping "Pair Device" will initiate the process of connecting the IT Asset Management application with the device that is planned to be used for scanning

### PAIRING CONNECTIVITY

#### Notes

- A loading screen appears to let the user know that the process of pairing is underway

### **SUCCESSFUL PAIRING**

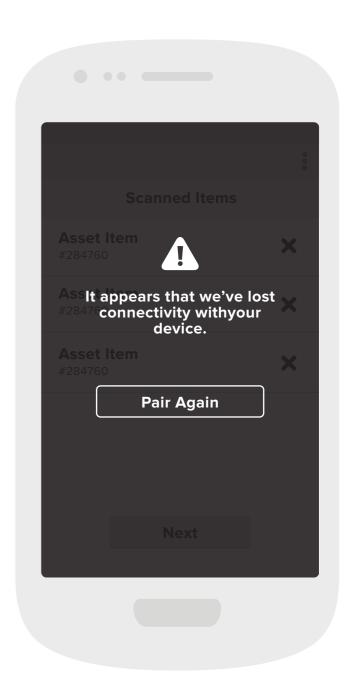

#### Notes

- If a device is successfully paired, users will get a notificatio

## LIST OF SCANNED ASSETS BY DEVICE

#### Notes

- Once the device has been successfully paired, the on-screen scanner slides up. Leaving users with the list view of the assets as they're being scanned by the paired device

# LOST CONNECTION

# Notes

- If the connection between the IT Asset
Management app and the paired device is
lost, users will get a notification with the
option to pair both devices
